

TITLE OF THE INVENTION

VASCULAR ENDOTHELIAL CELL GROWTH FACTOR II

ABSTRACT OF THE INVENTION

5       Vascular endothelial cell growth factor II is purified from the  
culture media used to maintain mammalian glioma cells. The protein is  
a heterodimer, stimulates mitogenesis of mammalian vascular  
endothelial cells and is useful for the promotion of vascular  
10       development and repair. This unique growth factor is also useful in the  
promotion of tissue repair.
